1.6 Foot notes

Here is a footnote reference,[1] and another.[2]

This paragraph won't be part of the note, because it isn't indented.

1.7 Inline notes

Here is an inline note.[3]

[1]Here is the footnote.

[2]Here's one with multiple blocks.

Subsequent paragraphs are indented to show that they belong to the previous footnote.

```
{ some.code }
```

The whole paragraph can be indented, or just the first line. In this way, multi-paragraph footnotes work like multi-paragraph list items.

[3]Inlines notes are easier to write, since you don't have to pick an identifier and move down to type the note.
